The proposed amendment raises new issues that would require further consideration and/or search with respect to the discrepancy between the corrected copy and the clean copy of the amendment in claims 12 and 13.

Response to Arguments

Applicant's arguments have been fully considered but they are not deemed to be persuasive.

With respect to "analogs", there is no definition of this terminology in the as-filed specification, but only a discussion of how "analogs" may be "derived" (Specification, page 3, paragraph 5). Therefore, the metes and bounds of this term are unclear.

Regarding the art rejections, the arguments are directed to claims that are not entered.

Therefore the rejection is deemed proper and it is adhered to.
